Tax Not Included

The call will be Station-to-Station if you tell the operator you will talk with anyone available at the called telephone and Person-to-Person if you ask to talk with a specified person. Station-to-Station rates are lower than Person-to-Person rates because less operator labor and less use of long distance facilities are required to complete them.

Special rates for both Station-to-Station and Person-to-Person calls are in effect every night from 7 p.m. to 4:30 a.m. and all day Sunday. These rates are lower than corresponding week day rates on calls for distances of about 50 miles or more. The minimum reduced rate is 35 cents for Station-to-Station calls and in general 50 cents for Person-to-Person calls.

MT. VERNON DIRECTORY

T. E. Whitlock, District Manager, Davenport, Iowa

E. L. Simpson, Manager

Emergency and Telephone Service Calls

- FIRE (to report a fire)** Dial 4381
You may also call the operator (Dial "O") for assistance in emergencies
- To make a Long Distance Call** Dial "O" Operator
- For numbers not listed in the directory** Dial "O" Operator
- For assistance in calling, or for time of day** Dial "O" Operator
- To report a telephone out of order** Dial "O" ask for "Repair Service"
- For business transactions with the telephone company** ... Dial "O" ask for "Business Office"

Telephone bills may be paid at Meredith's Rexall Drug Store, 112 1st Street W., or the payment may be mailed to the Northwestern Bell Telephone Company at Mt. Vernon, Iowa. If no answer is received on calls to the Operator "O", notify our agent, Meredith's Rexall Drug Store, 5621.

Use of the Dial Telephone

After obtaining the correct number from the directory, remove the receiver. Almost immediately a steady humming sound, called the dial tone, will be heard which lets you know that the central office equipment is ready to receive your call.

How To Dial

Dial each figure of the number you are calling in the order shown in the telephone directory.

Take, for example, the dialing of telephone number 7391. After hearing the dial tone, place the forefinger firmly in the dial opening through which the figure "7" is seen. Turn the dial around in a clockwise direction until your finger strikes the finger stop. Remove your finger and let the dial return to its normal position without forcing or retarding its movement. The remaining figures "3," "9" and "1" may be dialed in a similar manner.

If you make a mistake while dialing, or if your finger slips from the dial before reaching the finger stop, hang up the receiver for a few seconds. Then remove it and, after hearing the dial tone, dial each figure of the number again.

Service Signals

Ringing Signal—This is a "burring" sound that will be heard at regular intervals which indicates that the bell of the called telephone is being rung.

Busy Signal—This is a "buzz-buzz-buzz" sound that will be heard when the line of the called telephone is in use.

Use of Party Lines

Always listen for the dial tone before starting to dial. If you should hear successive clicks in your receiver, indicating that another party on the line is dialing, hang up your receiver and make your call a little later. In case you do not hear the dial tone and no one seems to be using the line, inquire whether the line is in use. If there seems to be no one on the line, replace your receiver for a few seconds. Then remove it and the dial tone should be heard.

To Call Another Party On Your Line

If the first three figures in the number you are calling are the same as those in your number this indicates that the party you wish to reach is on the same line.

On calls to parties on your own line, dial "9", the last figure in your number and the last figure in the number of the telephone you wish to reach. For example, if number 2345 wishes to call 2346, you would dial 956. Immediately upon dialing such a number, you should hang up your receiver to permit the bells to ring. When the person called has answered, your bell will stop ringing and you may remove the receiver and start your conversation. If your bell does not stop ringing after a reasonable period, it indicates that there is no one to answer at the called telephone. You then should remove your receiver for a few seconds and replace it. This will stop your bell from ringing and disconnect you from the called telephone.

OUR POLICY

The policy of this organization, as a part of the Bell System, is to provide at all times the best possible telephone service at the lowest rates consistent with reasonable earnings and fair treatment of employees.
